

enriched air nitrox (EAN) diver specialty

Diving with enriched air nitrox lets you safely extend your no stop time beyond the no decompression limits for air. Diving with enriched air means more time underwater - but you need to be certified as an Enriched Air Diver to get enriched air fills.

Whether you're into underwater photography or wreck diving, on vacation in some tropical paradise or just out for a leisurely day of diving at your local dive site, the PADI Enriched Air Diver course helps you get more out of diving by giving you more time underwater.

- Learn to analyze cylinder contents.
- Plan enriched air dives using tables and dive computers.
- Safely increase your no stop time.

Certification counts toward the Master Scuba Diver rating

ENRICHED AIR NITROX DIVER

min age. 15

1 DAY
