

multi-level diver specialty

Do you want to maximize your dive times? (Of course). Want to get the most out of your dive computer and The Wheel? (Naturally). Then the PADI Multilevel Diver Specialty course is for you.

In this course, you learn how to plan dives that extend your bottom time by crediting you for slower nitrogen absorption when you ascend to a shallower depth. That's the way you really dive, after all. You'll learn to use The Wheel version of the RDP for planning multilevel dives, making it a great companion for your dive computer (as well as a way to make multilevel dives if you forget to bring your computer).

- Plan and execute multilevel dives (different depths on the same dive)
- Back up your dive computer and plan multi-level dives with The Wheel™
- Maximize your no stop time

Certification counts toward the PADI Master Scuba Diver rating.

MULTI-LEVEL DIVER
